MUDIGERE

1) The Municipal Councillors and other leading citizens of Mudigere made the following representations -

(a) That the town's water-pumping installation has been a heavy burden on the slender resources of the Municipality, and that it might therefore be electrified at the earliest opportunity

(b) In this connection, it is learnt that the town needs a supply of 16,000 gallons a day and the pumping of this quantity costs the Municipality Rs 4,000/- a year with the result that the Municipal Council is unable to undertake any other improvements or responsibilities It is also learnt from the Deputy Commissioner that nearly four oil engines installed at different times are not in service and that some of these are out of order This seems rather deplorable at a time when every engine and pump has to be pressed into service The Sanitary Engineer may have all this equipment carefully examined with a view to see how many of them could be repaired and put into service here or in other places e g. for pumping water for irrigation purposes

(c) In this connection, the feesibility of installing one or two hydraulic rams of the type installed and functioning satisfactorily at Marconnalli may be investigated The installation of hydraulic rams appears prima facie feasible with a perennial river flowing by the town - (the Executive Engineer confirms this) - and if this could successfully be installed, it will save thousands of rupees for the Municipality which can be utilised for a Municipal High School and the provision of other much needed amenities. The Sanitar Engineer may kindly examine these matters and submit a report very early

---

2) the above representation was made to the Minister for Agriculture during his recent Tour in the Kadur Dist

3) submitted with a draft letter calling for the opinion of the C E for 2nd in the matter

Office of the Chief Engineer
Irrigation in Mysore,
Bangalore dated the 6 Nov 1946

To

The Secretary to Government,
Revenue Department,
Bangalore

Sir

Sale of Crossley and Lister Engines of Mudigere water works and the electrification of the water works

---

With reference to your letter No L 14764 dated 29th June 1946 on the above subject I have the honour to state that the Minister for Agriculture was pleased to order that all old engines and pumps should be repaired and put into service (vide extract III from the tour notes of the Minister for Agriculture during February 1946)

Accordingly the President of the Municipality was informed that the engines would not fetch any good amount if they were sold in their present condition and that it was therefore proposed to repair the engines But he now desires that the engines might be sold as they are as the same are irreparable for want of spare parts since they are of very old type as resolved in their meeting of the 10th July 1946 (herein enclosed) will follow

I request you therefore to be so good as to communicate orders of Government whether the engines referred to above may be sold in Public auction after giving wide publicity and the amount realised thereby credited to Mudigere Municipality

Regarding the electrification of water works, I am of opinion that the water works may be electrified very early as the cost of maintenance will be considerably reduced and the efficiency of the pumping unit will also improve

I have the honour to be
Sir
Your most obedient servant,

ksr 2/11
